

# INDIAN RAILWAY STUDY GROUP DATASHEET

## CEYLON GOVERNMENT RAILWAY - LOCOMOTIVE LIST, 1964

This official locomotive list, extracted from a Working Timetable, gave the situation as at September 1964 and included the class batch suffix letters which were omitted from "Indian Locomotives, Part 1". It should be noted that classifications were altered on rebuilding; thus all the D2 and F1 series were superheater rebuilds of D3 and F2 respectively, and T2 were diesel rebuilds of the R3 steam railcars.

<u>Class</u>	<u>Type</u>	<u>Numbers</u>	<u>Class</u>	<u>Type</u>	<u>Numbers</u>

Hugh Hughes

## BROAD-GAUGE DIESEL-HYDRAULIC POWER COACH

for heavy-duty trailer haulage and multiple-unit working on busy inter-city and suburban routes with considerable gradients. Behind the driving compartment are the luggage compartment and the engine room followed by a saloon-type passenger compartment. These powerful coaches are the prime movers of four-car train units and up to four such trains can be controlled from one driving position. The coaches were developed and designed for the
